

## ***Bombhunters***

### **Synopsis**

This feature length film project documents the effects of Unexploded Ordnance (UXO) on Cambodian people, both within their homeland and in the U.S.

In particular, "*Bombhunters*" documents villagers efforts throughout rural Cambodia as they seek out UXO and attempt to render it safe for sale to the scrap metal industry in order to survive.

"*Bombhunters*" will be incorporated into a larger strategy of UXO education projects in SE Asia, and as an educational and fundraising instrument in the West.
